

Cinema Project Experience

ADK has been working with the cinema exhibition industry for as long as its founder has been an acoustical engineer. This experience has extended through work with dozens of exhibition companies involving thousands of auditoria spread over four continents. Many of the noted projects were completed by ADK's founder while principal with another acoustical consulting firm.

Sound is a pivotal element in motion picture presentation, and acoustics of the rooms in which films are presented is the foundation of ADK's successful experience.

Also pivotal to success in acoustical design and consultation is testing design concepts for compliance with established criteria. ADK has been fortunate to be able to test the acoustical performance of most of the cinema projects on their client list.

Cinemas are often one of the anchor tenants in mixed-use developments. There are oftentimes such potential "bad neighbors" as bowling alleys and nightclubs located above, below, or beside a cinema development and properly anticipating the associated acoustical issues is a specific strength in ADK's experience.

Strike City, Westfield Sunrise Mall – Massapequa, New York

Sound and impact isolation of bowling operations within mall building

South Shore Mall – Bayshore, New York

Isolation of fitness club tenant on mezzanine level from other mall tenants

Westfield Acoustical Lease Language Development – Shokie, Illinois

Review and revision of lease language concerning acoustical elements needed for tenants and landlord to avoid issues involving sound isolation and noise and vibration control.

Metreon Mall – San Francisco, California

Sound isolation of elevators from cinema complex; isolation of existing cinemas from proposed Target store below.

American Multi-Cinema, Inc. - Thousands of screens nationwide, in

China, Japan, Canada, and Europe

Consultations in room acoustics, sound isolation, and mechanical, electrical, and plumbing systems, noise and vibration control for new and existing auditoriums. Also, post-construction acoustical testing conducted in all auditoriums to ensure strict acoustical performance criteria is achieved.

Century Theaters (now owned by AMC) – San Francisco, San Jose, Las Vegas, Tennessee, and Montana.

Acoustical measurements, analysis, and recommendations to improve sound isolation problems and ambient noise concerns.

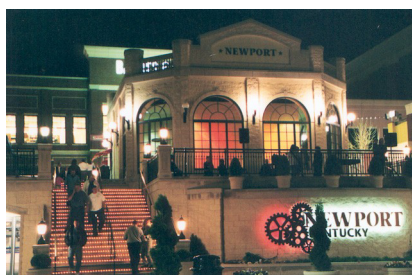

Cinemex – Miami, Florida

Acoustical consultations, development of prototype design, analysis, and recommendations for future cinemas.

Kerasotes Theatres (now owned by AMC) – Central United States Region

Acoustical consultations, development of prototype design, analysis, and recommendations for cinema expansion program.
